

# AGRICULTURE AND RESIDENTIAL – AR

## Rural and Open Space District

Adoption Date: March 18, 2015

Amended Date: January 23, 2019

Print Date: July 16, 2019

### Purpose:

The AR district is primarily intended to preserve agricultural, forested, and other open lands until ripe for non-agricultural development, including residential, commercial, and industrial development, and to allow for very low density residential development. The AR district is intended for areas planned for future non-agricultural development in the Comprehensive Plan, but not yet ripe for such denser development due to a number of factors, including but not limited to the lack of public utilities or services in the area, inadequate roads, and a sufficiently supply of lands zoned for development elsewhere. ### Dimensions and Density Standards:

Minimum Lot Size	Minimum Lot Width (ft)	Minimum Public Street Frontage (ft)	Maximum Total Building Coverage	Minimum Accessory Structure Floor Area (sf) <sup>a</sup>	Minimum Landscape Surface Ratio (LSR)
20 acres <sup>fg</sup>	300	60	N/A	1,600 <sup>h</sup>	N/A

<sup>a</sup> Maximum Accessory Structure floor area may be increased by site plan approval under Section 94.16.09 and per the standards in Section 94.4.09(2).

<sup>f</sup> Instead of a 20 acres minimum lot size, land in the AR district may be developed at a density of one residential lot per 20 acres and a minimum lot width of 150 feet. See Section 94.5.08 for further description and method of calculation for regulating at a one residential lot per 20-acre density in the AR district.

<sup>g</sup> Parcel size in the AR district to be calculated based on gross acreage, including roads and navigable waters within the deeded parcel. Each such parcel meets the 20 acre minimum, even if net acreage is less than 20 acres following the removal of roads and navigable waters, if such removal does not reduce the gross acreage by greater than 15% for corner parcels or 10% for all other parcels.

<sup>h</sup> Maximum Accessory Structure Floor Area is increased to 2,500 square feet on parcels that exceed 10 acres.

<sup>b</sup> Additional setbacks may be required along zoning district boundaries for bufferyards, if required for the particular land use under Article 4 or Section 94.11.02(3)(d).

<sup>c</sup> Minimum street side yard setbacks are equal to the minimum street side yard setbacks for principal structure.
