PREFACE

This Code contains a complete amendment of the general and permanent ordinances of the Village of Weston, Wisconsin as of: 3-25-2016

Source materials used in the amending and preparation of the Code historically were the 1982 Code, and amending ordinances through Ordinance of 3-25-2016. The source of each section where applicable, is included in the history note appearing in parentheses at the end thereof. The absence of such a note indicates that the section is new and was adopted for the first time with the adoption of the Code.

Source materials are also accessed by the use of hyperlinks to their original source such as; Wisconsin State Statutes, Wisconsin Administrative Code, State of Wisconsin Constitution, International Code, Federal law and other varied sources.

The chapters of the Code have been conveniently arranged in alphabetical order where possible, and the various sections within each chapter have been catchline to facilitate usage. These catchlines are not to be construed as the ordinances which are detailed further in the texts. Notes which tie related sections of this Code together have been included. Notes which refer to a relevant state law, state code, federal law, or other governing code have been linked to the source code via the use of hyperlinks. A table (State Law Reference Table) listing where the referenced code is located within the code is included at the end of these codes.

Chapter and Section Numbering System

The chapter and section number system used in this Code is similar to many used in state and local government codes. Each section number consists of two parts or in some Chapters three parts separated by a point. The figure before the point refers to the chapter number, and the figure after the point refers to the position of the section within the chapter. The third figure, where used after the second point refers to the position of a subsection of the primary section. Thus the second section of chapter 1 is numbered 1.101, and the first section of chapter 6 is 6.100. Where there is a second point and a third figure is used, that further delineates subsections as in chapter 94 is 94.9.01. Under this system, each section is identified with its chapter, and at the same time new sections can be inserted in their proper place by using the decimal system for amendments. New chapters may be included by using one of the reserved chapter numbers. Care should be taken that the alphabetical arrangement of chapters is maintained when possible when including new chapters.

Index

An index has been prepared. Each particular item of information that a person would be seeking is located under a general title such as; ANIMALS or BUILDINGS, however this does not mean that every possible iteration is to be found. The terminology, some of which is couched in lay phraseology, others in legal terminology, and still others in language generally used to local government officials and employees. There are numerous cross references within the index itself which stand as guideposts to direct the user to the particular item in which the user is interested. The Village web site provides for a

search of all items provided which may assist in the location of a particular item. However, the method of search may not be fruitful on its first try and several tries with different search criteria may be required.

Bookmarks and Hyperlinks

These documents are accessible by the use of the Village of Weston web site with an internet connected computer. The documents have been created with Microsoft Word® 2016. Each chapter has a Table of Contents which is hyperlinked from the section number in the Table of Contents to the location of the section in the document (these are referred to as “bookmarks”).

Each citing of an outside notation, state statute, administrative code, federal law, or other outside source of information has been linked by the use of external hyperlinks, which can be viewed by simply placing the cursor over the blue colored and underlined hyperlink, pressing the “ctrl” key then left click. This action should take you to the source origin of the cited reference. (These are referred to as “external hyperlinks”)

Code Cross References

A Code Cross Reference code Table has been provided to assist in locating where specific codes have adopted, cited or made reference to other statutes, administrative codes, federal, international or other source information. This code cross reference code table lists; the outside code, statute, data, source, etc. then lists where that particular code, statute, data, source is cited in the code by section number. NOTE many cited codes, statutes, data, sources are cited in several code sections.

STATE LAW REFERENCE TABLE

This table shows the location within this Code, either in the text or notes following the text, of references to Wisconsin Statutes, International and National Codes, AASHTO, ASTM E .
